LIFELINE

November, 2015

(Someone to talk to....who understands)

Greetings to the members and supporters of the Harvey Floyd Chapter of Us TOO International.

Our support group vision is: *"To provide the highest level of leadership, compassion and promotion of an enhanced understanding of prostate cancer while improving the quality of life for survivors, their families and men at risk through proactive programs and positions".*

Proton Beam Radiation Therapy for Prostate Cancer

Proton Therapy for prostate cancer is a treatment option that involves using a focused ray of proton particles to destroy cancerous tissues. The treatment is capable of delivering high doses of radiation to accurately target prostate cancer cells without causing damage to healthy tissue surrounding the prostate.

Our guest speaker for our November Support Group Meeting will be Ron Nelson, an author as well as being a Prostate Cancer survivor and member of the Midlands Chapter of Us TOO International. Our topic will be **"Our Secret Superpower as Prostate Cancer Survivors."**

Ron will talk about what is like to receive proton beam radiation therapy for prostate cancer. This information will almost certainly be of interest to anyone considering proton radiation and may help to decide whether this is the right approach. Also this may serve as a helpful guide for those who have already chosen Proton Beam Therapy. Ron uses non-technical language and just enough light humor to soften a serious subject while providing critical information about what to expect before, during, and after proton therapy in an easily understood and very personal manner.

We look forward to see each and everyone on Monday, November 2nd.
