LIFELINE

December 2016

(Someone to talk to....who understands)

Happy Holidays to the members and supporters of the Harvey Floyd Chapter of Us TOO International

Our support group vision is: "To provide the highest level of leadership, compassion and promotion of an enhanced understanding of prostate cancer while improving the quality of life for survivors, their families and men at risk through proactive programs and positions".

What is Palliative Care?

Palliative care is specialized medical care for people with serious illness, including advanced Prostate Cancer. It focuses on providing relief from the symptoms and stress of a serious illness. The goal is to keep the patient comfortable by improving the quality of life for both the patient and the family.

Palliative care is provided by a specially-trained team of doctors, nurses, social workers and other specialists who work together with a patient's doctors to provide an extra layer of support. It is appropriate at any age and at any stage of a serious illness and can be provided at the same time as other curative treatments.
