LIFELINE

September 2017

(Someone to talk to....who understands)

Greetings to all the members and supporters of the Harvey Floyd Chapter of Us TOO .

Our support group vision is: "To provide the highest level of leadership, compassion and promotion of an enhanced understanding of prostate cancer while improving the quality of life for survivors, their families and men at risk through proactive programs and positions".

GHS Men's Health Center

It's widely known that women are the healthcare decision makers in most families. They are also most likely to schedule annual exams and preventive services. Greenville Health System-Regional Urology is taking an approach that could improve the likelihood of men visiting the doctor.

GHS Regional Urology has established Regional Urology Men's Health Center. The center is open the third and fourth Thursdays of each month between 8 a.m. and noon. Appointments are required and men do not have to be an existing patient with the practice.

The Men's Health Center is focused on secondary health issues that are the result of chronic diseases like cancer or cardiovascular disease. These issues could include infertility, erectile dysfunction, low testosterone and a host of other issues. Regional Urology Men's Health Center is dedicated to the health needs of men in our community, The goal is to help men take charge of their health and to improve their quality of life.
