LIFELINE

March 2015

(Someone to talk to....who understands)

Greetings to the members and supporters of the Harvey Floyd Chapter of Us TOO International.

Our support group vision is: *“To provide the highest level of leadership, compassion and promotion of an enhanced understanding of prostate cancer while improving the quality of life for survivors, their families and men at risk through proactive programs and positions”.*

Treatment Options for Late Stage Prostate Cancer

Prostate cancer is considered advanced or late stage if it has spread beyond the prostate gland and the area around the prostate. Some men with newly diagnosed prostate cancer have advanced, or stage IV prostate cancer. In other men, advanced prostate cancer will develop after original treatment for localized disease.

Advanced prostate cancer is usually treated with a combination of treatments, which may include hormone therapy, chemotherapy, immunotherapy, or radiation. Although advanced prostate cancer is not curable, treatment can often help to control the cancer for prolonged periods of time. This can help to reduce symptoms and improve the quality of life.

Our guest speaker for our March meeting is Dr. Robert Siegel, of Bon Secours Health System . Our topic will be Late Stage Treatment Options

We look forward to seeing each and everyone on Monday, March 2nd, beginning at 7:00 p.m

click here for Greenville online feature on Dr. Siegel:
