LIFELINE

July 2018

(Someone to talk to....who understands)

Greetings to all the members and supporters of the Harvey Floyd Chapter of Us TOO .

Our support group vision is: *“To provide the highest level of leadership, compassion and promotion of an enhanced understanding of prostate cancer while improving the quality of life for survivors, their families and men at risk through proactive programs and positions”.*

USPSTF updates recommendations on Prostate Cancer

The US Preventive Services Task Force (USPSTF) has updated its recommendations on prostate cancer screening (PCa) after reviewing evidence published since the issuance of its 2012 statement. In a paper published in the *Journal of the American Medical Association*, the USPSTF concluded that men aged 55 to 69 years should decide whether to undergo periodic PSA screening after a discussion of the potential benefits and harms with their clinician. According to USPSTF, there is “moderate certainty” of a “small” benefit of reducing death with screening of men in this age group (grade C recommendation). Such screening may prevent 1.3 PCa deaths per 1000 men screened over 13 years. Screening may also prevent 3 cases of metastatic PCa per 1000 men screened. Men are free to decide against screening, if they desire.

We trust you are enjoying your summer and we look forward to resuming our monthly support group meetings on September 9th.
