LIFELINE

February 2020

(Someone to talk to....who understands)

Greetings to all the members and supporters of the Harvey Floyd Chapter of Us TOO .

Our support group vision is: *“To provide the highest level of leadership, compassion and promotion of an enhanced understanding of prostate cancer while improving the quality of life for survivors, their families and men at risk through proactive programs and positions”.*

Urinary Incontinence and Erectile Dysfunction

There are side effects from each treatment for prostate cancer. The most common side effects of treatment are urinary incontinence (the inability to control your bladder) and erectile dysfunction (the inability to achieve a full erection).

Improvements in surgery and radiation therapy along with improvements in drugs and treatments have reduced the severity and frequency of these side effects. Side effects depend on many factors including the cancer stage, treatment choice, and your overall health. Men should get educated about the side effects of prostate cancer and treatment. This is critical to maintaining a good quality of life and a positive attitude while fighting the disease. Men should learn about the potential side effects from each treatment option considered. While not everyone will have every possible side effect, it is important to understand the impact of the side effects.

We look forward to seeing you at our February 3rd Support Group meeting. Our speaker will be Dr. Blake Andrew Wynia MD – Urologist, Prisma Health Regional Urology. Our topic will be Urinary Incontinence and Erectile Dysfunction

<u>Upcoming Meetings</u> <u>Upcoming</u>	<u>Outreach Events</u>	We thank the Greenville Us TOO Support Group Prostate for sponsoring our Refreshments
