LIFELINE

May 2020

(Someone to talk to....who understands)

Greetings to all the members and supporters of the Harvey Floyd Chapter of Us TOO .

Our support group vision is: *“To provide the highest level of leadership, compassion and promotion of an enhanced understanding of prostate cancer while improving the quality of life for survivors, their families and men at risk through proactive programs and positions”.*

Covid-19 and Prostate Cancer

Note: Greenville SC, Us TOO Support Group meetings remain suspended until further notice.

Because the COVID-19 pandemic is new, there is not much information available on how it affects prostate cancer patients. However, in general, patients with cancer are considered high risk of developing more serious illness due to weakened immune systems as a result of undergoing active treatments.

Even those not receiving active therapy still need to be cautious because of the effects of prior therapy, which can last for a long time. Boosting the immune system by keeping stress levels low, getting adequate sleep, moderate physical exercise, and good nutrition can be helpful.

While prostate cancer patients should follow the general guidelines to prevent the spread of COVID-19, **it is important to consult your doctor for information specific to your condition.**

In the meantime, please adhere to the CDC recommendations. Click this link:
